

JEFFIN JOHNY

Senior Android Engineer

Thrissur, Kerala, India | 7907262466 | jef4tech@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Android Developer with over 6+ years of experience in crafting high-performance mobile applications. Expert in Kotlin, Java, and MVVM architecture. Proven track record of leading development teams, managing full app-store deployment cycles, and reducing error rates through proactive monitoring. Proficient in Agile methodologies and modern Android libraries like Retrofit, Room, and Jetpack.

TECHNICAL SKILLS

- **Languages:**Kotlin, Core Java, SQL.
- **Android Frameworks/Tools:**Android Studio,Jetpack Compose, Jetpack (Navigation, Data Binding), Coroutines, WorkManager.
- **Architecture:**MVVM Architecture.
- **Libraries:**Retrofit, Room, Glide, Gson, Stetho, Volley, Shimmer, Markdown.
- **Backend/Database:**Firebase (Firestore, Authentication, Cloud Messaging, Crashlytics), SQLite, MySQL, REST API, Socket.io.
- **Tools & Methodologies:**Git, Jira, Agile, Google Analytics, Material Design.

PROFESSIONAL EXPERIENCE

Appadore Private Limited | Android Developer

August 2023 – March 2026

- **Modern UI Transition:** Spearheaded a **hybrid UI approach**, integrating **Jetpack Compose** into existing XML-based modules to accelerate feature development while maintaining backward compatibility with legacy layouts.
- **Architected and developed Project Flashat from base**, utilizing **Kotlin** and **MVVM** Architecture to build high-performance core modules including Chat, Feeds, Registration, and Multimedia.
- **Engineered a real-time communication engine** by integrating **Socket.io** for instant messaging and the **Agora RTC SDK** for high-quality audio/video conferencing.
- **Implemented robust data persistence** using the **Room Database** and optimized network communication via **Retrofit** and **REST APIs**, ensuring a "local-first" user experience.
- **Managed end-to-end Google Play Store deployment**, including keystore management, versioning strategy, and navigating the Play Console submission process.
- Optimized application performance through rigorous code reviews and the implementation of **Kotlin Coroutines and Flow**, resulting in smoother UI transitions and a **20% reduction in error rates**.
- **Orchestrated complex UI states** using **Material Design** principles and **Jetpack components**, ensuring high-concurrency features like virtual gifting remained responsive under heavy load.
- **Collaborated within an Agile/Scrum framework**, utilizing **Jira** for task prioritization, sprint planning, and cross-functional coordination with backend and design teams.

Catsys Technologies | Android Developer

March 2023 – August 2023

- **E-commerce Systems:** Developed stable and maintainable E-commerce applications with a focus on real-time data synchronization using **Firebase Firestore**.
- **Authentication:** Integrated **Firebase Authentication** for secure user onboarding and credential management.
- **UI Modernization:** Refactored legacy UI components using **Material Design** principles, improving overall app performance and responsiveness.

Freelance | Android Developer

January 2022 – March 2023

- Implemented applications using modern technologies including Coroutines and **Jetpack Navigation**.
- Integrated third-party REST APIs using **Retrofit** and utilized MVVM architecture for clean code separation.

Kraftlabs Technologies | Android Developer

July 2019 – June 2021

- **Enterprise CRM:** Built and maintained robust CRM applications for large-scale enterprise clients.
- **Cloud Messaging:** Integrated **Firebase Push Notifications (FCM)** to drive user engagement and real-time alerts.
- **Collaboration:** Partnered with UI/UX designers to translate complex wireframes into technically feasible and performant Android layouts.

Grapes Technologies | Android Developer

January 2019 – July 2019

- Played a key role in writing application logic using the Android SDK and Android Studio.
- Managed networking and API integrations using the Volley library.

KEY PROJECTS

- **Flashat:** A social interaction app featuring real-time socket communication, MVVM, Shimmer loading, and Markdown support. **Link:** <https://play.google.com/store/apps/details?id=com.app.messei>
- **YLLW:** An affiliate E-commerce Android app with Retrofit networking and Firebase notifications.
- **Mercy Cool:** A service-booking app for AC repair with admin validation and worker tracking.
- **Ayurware:** A stock management application using SQLite for local database persistence.

EDUCATION

Universal Engineering College (Calicut University) | 2016

B.Tech in Electronics and Communication Engineering | SGPA: 5.0

Govt. Model Boys HSS, Thrissur | 2011

Plus Two (Higher Secondary) | Percentage: 74%

St. Joseph EMHSS, Eravu | 2009

Tenth (SSLC) | Percentage: 81%

CERTIFICATIONS & ACTIVITIES

- Android Developer Certification: ATEES Industrial Training, TCR (May 2018)
- Extracurricular: Participant in Google DevFest 2021
- Personal Skills: Creativity, Team Leadership, Organization, Communication.
